

TH 9 - Data sheet

The TH 9 is a 9-color hybrid printing machine for multi-coloured printing of plastic tubes and sleeves. It can be configured to print inline or stand-alone.

The nine printing stations can be used independently of each other. Each station can hold a screen-printing unit, a flexo printing unit, an inLINE FOILING® unit, an IDD transfer module, a DiF module, or a varnishing unit. The printing and decoration units can be combined as desired and arranged in any order.

Printing stations	9
Printing performance parts/min	up to 110
